Deep Cancer Analysis for Personalized care

Scientific Bio-Minds Diagnostics serves customers spanning the entire healthcare and bioinformatics spectrum –from research institutions, hospitals and commercial laboratories to physicians and patients. Performed on blood, tissue or other patient samples, the diagnostics are a critical source of objective information for improved disease management and patient care.

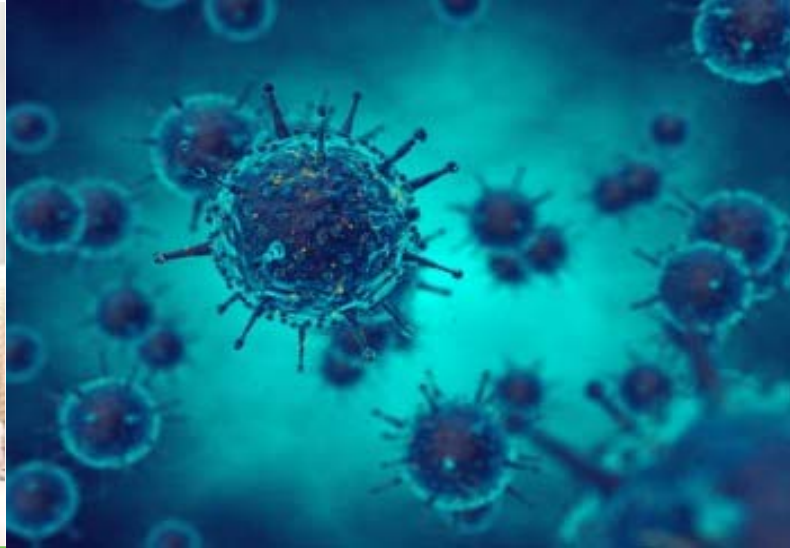

We offers the industry's broadest range of diagnostic tests. Our pioneering technologies and solutions not only help ensure an accurate diagnosis, they can detect the risk of disease, predict how a disease may progress, and enable the right treatment decision at the outset.
