

Scientific Bio-Minds is a private organization supporting genome research to predict large genomic data using bioinformatics methods through a network of leading edge services and local expertise.

We provide service in specific area on biology you can focus on what's next

- + Medical Genomics
- + Agricultural Genomics
- + Animal Genomics
- + Microbial Genomics

#### Consultation on Project Design

Our team of Genomic research group specifically on next generation sequencing (NGS) and Microarray will help to design the your specific experiment and also help to analyze genomic data.

#### Bioinformatics Analysis

Our services are supported by industry leading bioinformatics analysis.

The Scientific Bio-Minds bioinformatics team support all services offered by Scientific Bio and can work with data generated externally to deliver;

- High quality analysis
- Rapid turnaround time
- Tailor-made analysis for custom projects.

**Exome-Seq, Transcriptome-seq, RNA-Seq, SmallRNA-seq, Chip-Seq, Microarray etc..**

#### Customized design of genomic tools, software and databases

Our team of computer science programmers, IT professional group, biostatisticians and bioinformaticians will help to design

- + Customized databases as per the client needs
- + Customized tool development for genomic analysis
- + Customized software development
- + Algorithms Design
- + Algorithms Implementation
- + Data Analysis
- + Pipeline Design
